

3 Courses

Cloud Computing Law: Transactions

Cloud Computing Law: Data Protection and Cybersecurity

Cloud Computing Law: Law Enforcement, Competition, & Tax

Apr 19, 2024

KE ZHU

has successfully completed the online, non-credit Specialization

Cloud Computing Law

In this Specialisation, learners developed an understanding of the legal and regulatory implications of using and providing cloud computing services. The Specialisation consists of three courses and covers a range of relevant legal areas, including cloud contracts, data protection law, and law enforcement access. To apply their knowledge, learners analysed case studies and answered a series of multiple-choice questions which tested the ability to describe cloud providers' and customers' legal rights, to identify and assess relevant legal risks, and to suggest possible legal and technological solutions.

Professors Christopher
Millard, Ian Walden, and
Chris Reed

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
